

RELATIVE HUMIDITY & TEMPERATURE CONTROLLER **AHT-74**

SPECIFICATIONS

Scale Range

Dimensions

Model ASHEAHT-74

Microcontroller based digital RH & **Type** Temperature indication with four-point

control action.

Ashe HTP-1 Humidity & Temperature Input Signals / Sensors

Probe

Dual 4-digit, 0.5"/0.4" seven-segment red **Display** LED display.

> -999 to +9999 000.0 to 100.0% RH.

Calibration -50 to +100 deg C.

< 200 mS

Response time 0.1% of span. Linearity

Calibration facility By Membrane keypad on front panel. **Control output** Four relay changeover contacts

(configurable).

Contact Rating 10 Ampere @ 230 VAC (resistive loads).

Control Logic High-Low (Configurable). By LEDs on front panel. Alarm indication

Memory Non-volatile. Accuracy 0.1% of FSD.

Settings Settings for Control Logic, Set-points,

Hysterisis, etc. 96 x 96 x 80 mm $[W \times H \times D].$

90 V to 270 VAC, 50 hz. **Power Supply** Execution Panel mounting. **Enclosure** Industrial grade ABS. Weight Approximately 0.5 Kgs.

Operating Temperature 0 to 50 °C.

OVERVIEW

The ASHE AHT-74 is a micro-controller based Relative Humidity and Temperature Indicator with control outputs, offered in a highly compact, rugged and reliable execution. The instrument has three keys on the front panel, with which the operator can set the parameters and configure the instrument as desired.

The instrument accepts RS485 signal from the RH-cum-Temperature sensor probe as input signal. The instrument AHT-74 is factory calibrated, so that it doesn't require calibration at the plant site. The AHT-74 provides four control Relay outputs (two for each parameter), the set points of which may be configured with it's independent Hysterisis value, through the Membrane Keypad on the front panel.

The instrument operates on universal AC power supply (90 to 270 V AC, 50/60 Hz) and is offered in standard 1/4 DIN panel-mount execution. The instrument has non-volatile memory.

The RH & Temperature Indicating Controller Model: AHT-74 is an ideal instrument for Humidity & Temperature measurement and control applications. Other features include it's inherent accuracy and immunity to shocks, dust, ambient temperatures, and humidity. It is available in field-mounting (weather-proof / explosion-proof executions) and standard panel mounting enclosures.

Further, the instrument is manufactured using selected high-grade components which guarantee it's functionality and long operational life.

All ASHE range of instruments carry a lifetime warranty for design and workmanship.

FEATURES

- · Microcontroller based design.
- RH+T Sensor Probe Input
- High accuracy and linearity to input signal
- Dual 4-digit seven-segment LED displays
- Multiple Relay change-over contacts
- Very low power consumption and heat dissipation
- Fully configurable
- Retransmission option.
- Selectable Decimal-point
- Universal AC Power Supply
- On-Off control action options
- Rugged, industrial grade ABS enclosure
- High Noise immunity.
- Panel / Field / Hazardous-area installation in IP65 execution
- Proven record of several thousand installations
- Lifetime warranty on design and workmanship
