

# LOOP POWERED INDICATOR

## JM-408 MODULE

### SPECIFICATIONS

<b>Model</b>	ASHE JM-408 Module
<b>Type</b>	Microcontroller based Digital Loop Powered Indicator Module.
<b>Principle</b>	Signal amplification and powering.
<b>Input Signal</b>	4 to 20 mA DC.
<b>Linearity</b>	± 0.1%.
<b>Calibration facility</b>	Zero and Span settings by membrane keypad.
<b>Accuracy</b>	± 0.1%.
<b>Indication</b>	4-digit LCD / LED display.
<b>Display height</b>	0.5".
<b>Forward voltage drop</b>	5.5 Volts @ 20 mA.
<b>Sensing resistance</b>	6.00 Ohms.
<b>Polarity</b>	Auto-sensing.
<b>Settings</b>	Zero, Span, Decimal point.
<b>Response Time</b>	Typically 75 mSec.
<b>Power Supply</b>	Nil (Loop powered).
<b>Calibration Range</b>	To be specified.
<b>Dimensions</b>	66 mm dia x 20 mm thickness
<b>Execution</b>	Open OME Module execution can be offered in weatherproof or flameproof executions
<b>Weight</b>	Approximately 0.5 Kgs.
<b>Operating Temperature</b>	0 to 50 °C.

### OVERVIEW

The ASHE Model JM-408 Digital Loop Powered Indicator is a compact, rugged and reliable indicating instrument which is specifically designed for accurate process measurement applications in areas without power availability.

The microcontroller based Indicator accepts an industrial standard current input signal of 4 to 20 mA DC and displays the actual process value calibrated in the desired units, on a linear scale. The process value is displayed on a 4-Digit seven-segment LED or LCD digital display module. There is no necessity of any external Power Supply.

The instrument can be calibrated on any scale range from -9999 to +9999 units.

The Ashe JM-408 Indicator Module is therefore an ideal single unit substitute to conventional analog indicators because of its inherent accuracy in process control, besides other superior characteristics like total immunity to Shocks, Dust, Ambient temperatures, Humidity and Corrosive atmospheres. Its unique feature is that it is completely current loop-driven, eliminating the requirement of any external power supply source and associated cabling.

Further, the instrument is manufactured using selected high-grade components which guarantee its reliability and long operational life. The unit also has no moving parts, which greatly enhances its versatility.

### FEATURES

- No external power supply required.
- Standard 4 to 20 mA DC current loop powered operation
- Low Input impedance – negligible load on loop.
- High accuracy and linearity to input signal
- 4-digit displays
- Negligible power consumption and heat dissipation
- Low forward voltage drop
- Auto polarity sensing
- Selectable Decimal point
- LCD / LED display
- Front accessible Zero and Span calibration by membrane keypad
- Compact and rugged execution
- Hazardous-area installation option for IIA/IIB in IP65 execution
- Available in several dimensions
- Current limiting for I/O protection
- Proven record of several thousand installations
- Lifetime warranty on design and workmanship
